

SPECIFICATION

MODEL: SH-12AL (Forward Taping)

Part Number: HE12A*1U12L(*: Rank)

Halogen Free

InSb Hall Element

Tianjin Nanostech Electronics Co.,Ltd
C8-2, International Industrial City XEDA,
Tianjin, China

1. Application

This specification sheet is applied to Hall sensor that NANOS supplies.

2. Electrical Characteristics

2.1 Maximum Ratings

[Ta=25 ℃]

Parameter	Symbol	Rating	Unit
Maximum Input Voltage	lmax	20 (at 25 °C)	mA
Operating Temperature Range	Тор	-40 ~ +120	$^{\circ}$
Storage Temperature Range	Tst	-40 ~ +150	$^{\circ}$

2.2 General electrical specifications

[Ta=25℃]

2.2 General electrical specimentations					14 23 0]	
Parameter	Symbol	conditions		Тур.	Max.	Unit
Output Hall Voltage	Vh	Vin = 1V, B = 50mT		-	320	mV
Input Resistance	Rin	I = 0.1mA, B = 0mT	240	-	550	Ω
Output Resistance	Rout	I = 0.1mA, B = 0mT	240	ı	550	Ω
Offset Voltage	Vo	Vin = 1V, B = 0mT	-7	-	+7	mV
Temp. Coeff. Of Vh	αVh	Average on 0 ~ +40 °C, B=50mT, Ic =5mA	-	-1.8	-	%/°C
Temp. Coeff. Of Rin	αRin	Average on 0 $^{\sim}$ +40 $^{\circ}$ C, B=0mT, Ic =0.1mA	-	-1.8	-	%/°C

※ Note.

1) Vh = Vhm - Vo (Vhm : measured at 50mT) 3)
$$\alpha \text{Rin} = \frac{1}{\text{Rin}(T_1)} \times \frac{\text{Rin}(T_3) - \text{Rin}(T_2)}{(T_3 - T_2)} \times 100\%$$

2) $\alpha \text{Vh} = \frac{1}{\text{Vh}(T_1)} \times \frac{\text{Vh}(T_3) - \text{Vh}(T_2)}{(T_3 - T_2)} \times 100\%$
4) $T_1 = 20^{\circ}\text{C}, \ T_2 = 0^{\circ}\text{C}, \ T_3 = 40^{\circ}\text{C}$

2)
$$\alpha Vh = \frac{1}{Vh(T_1)} \times \frac{Vh(T_3) - Vh(T_2)}{(T_3 - T_2)} \times 100\%$$

4)
$$T_1 = 20^{\circ}C$$
, $T_2 = 0^{\circ}C$, $T_3 = 40^{\circ}C$

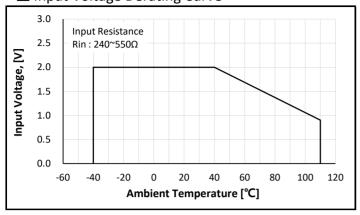

2.3 Rank Classification and Mark on Output Hall Voltage

Rank	Output Hall Voltage Vh (mV)	Measurement Conditions
D	196 ~ 236	V(- 4)/ P 50 - T
E	228 ~ 274	Vin=1V, B=50mT (Constant Voltage)
F	266 ~ 320	(Constant Voltage)

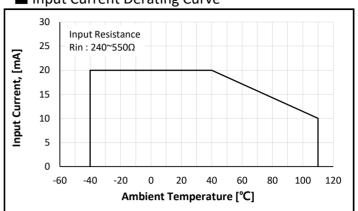

2.4 Characteristic Curves

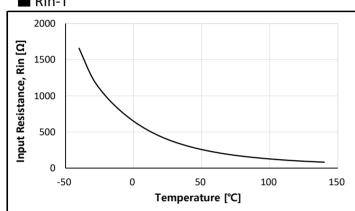

■ Input Voltage Derating Curve

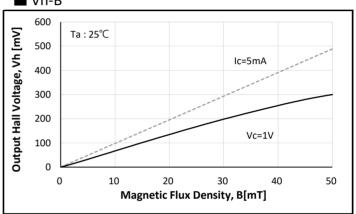

■ Input Current Derating Curve

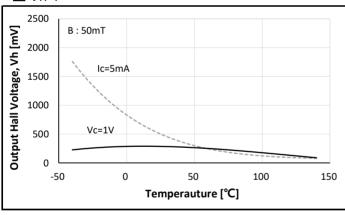

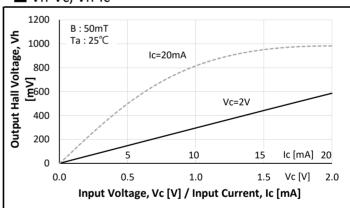

■ Vh-B

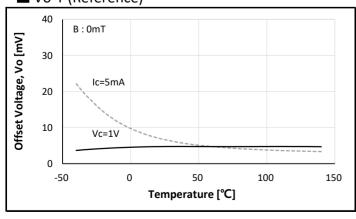

■ Vh-T

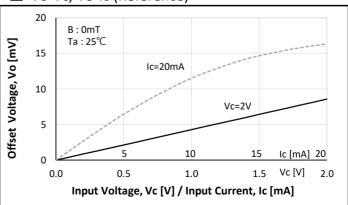

■ Vh-Vc, Vh-Ic

■ Vo-T (Reference)

■ Vo-Vc, Vo-Ic (Reference)

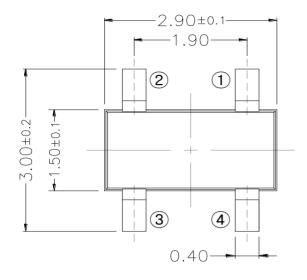

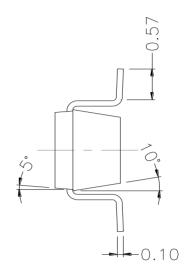

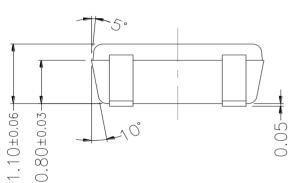

3. External Dimensions and Appearance

3.1 External Dimensions (Unit: mm)

Four leads of input-output terminals are designed in the diagonally symmetric mode and are equal in dimensions. SH-12AL(Forward taping) could be used without considering on the rotation of 180°.

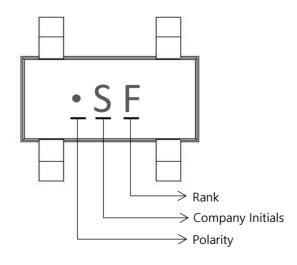

Lead Connection				
Input	1 (+/-)	3 (-/+)		
Output	2 (+/-)	4 (-/+)		

3.2 Marking Method

Devices should be marked by LASER beam in the form of 「• S + 'Rank' 」

4. Method for Mounting

4.1 Lead Frame

1) The material of lead frame is phosphor bronze alloy and the die bonded surface is plated by silver. The minimum thickness of plating is $3.0\mu m$.

2) Lead is plated by pure Sn and the thickness is controlled by $4^{\sim}12\,\mu\text{m}$.

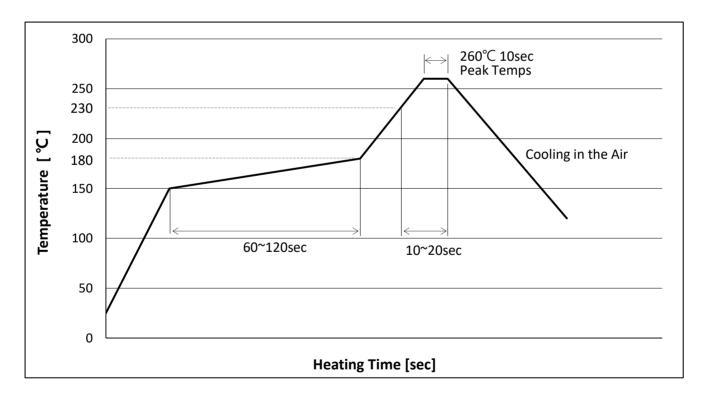

4.2 Soldering Conditions on PCB

- 1) No rapid heating and cooling is desired.
- 2) Preheating is recommended for 1 \sim 2minutes at 150 \sim 180 $^{\circ}$ C.
- 3) Reflowing is recommended for $10 \sim 20$ seconds at $220 \sim 260$ °C.
- 4) The number of times of reflow soldering should be two or less.
- 5) Solderability should be checked by yourself, because it is depend on solder paste material and other parameters.

4.3 Soldering Method and Temperature

Items	Methods	Temperature
Reflow	Soldering by passing the heated zone	Max 260°C in 10sec
Solder Iron	Soldering by solder-iron	Max 350°C in 3sec

4.4 Reflow Profile (Reference)

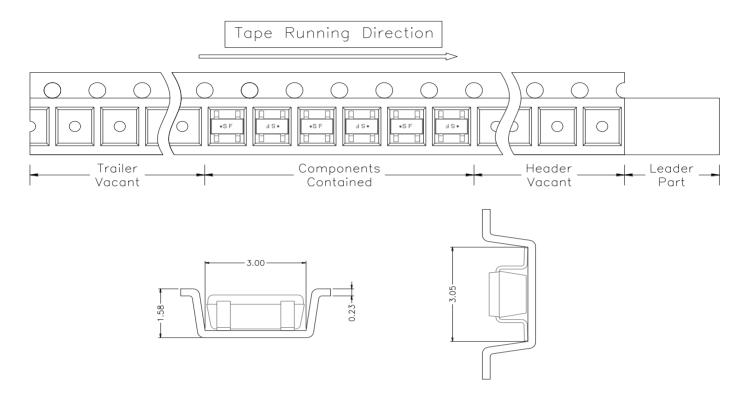

5. Packaging

5.1 Taping

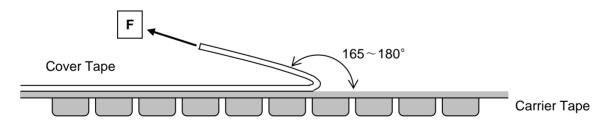

1) SH-12AL (Forward taping) should be packed marking side to cover tape side and put long side to running direction. 180° rotation has no effect on the application.

2) At least, 40mm vacant parts are made both front and rear side of tape.

7.2 Handling Methods of Tape

1) Pull Strength(F) = $20 \sim 70g$

- 2) Devices should not run out of a pocket when tape is bent down 15mm curvature.
- 3) Devices should not stick to cover tape.
- 4) Devices should be kept below 30 $^{\circ}\mathrm{C}$ and below RH80% in the shade.
- 5) Tape has no joint

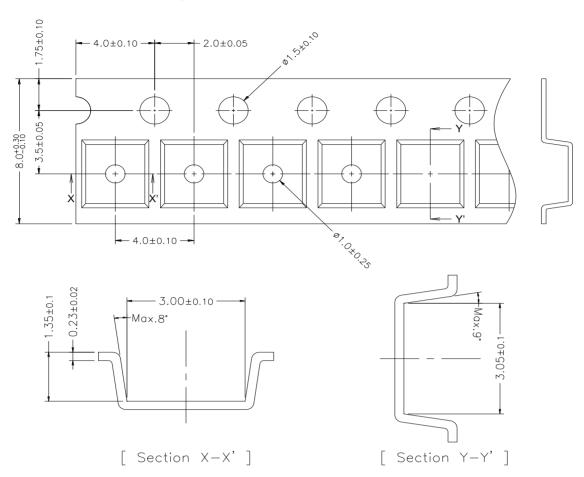

5.3 Packing Unit

- 1) 3,000pcs of devices are packed in one reel.
- 2) Five reels are packed in one inner box.
- 3) Four inner boxes, 60,000pcs of devices, are packed in one outer box.
- 4) Dummy could be packed for safe dealing.

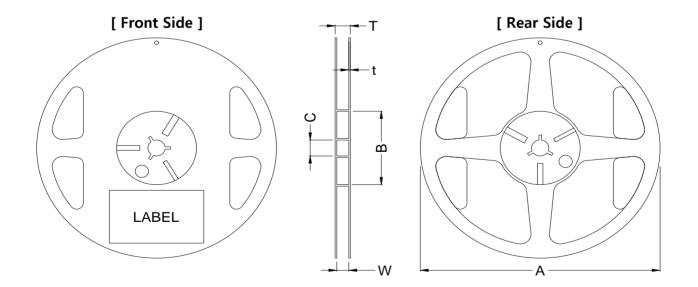

5.4 External Dimensions of Carrier Tape (Unit : mm)

5.5 External Dimensions of Reel (Unit: mm)

[Unit : mm]

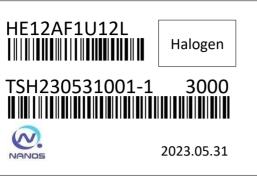

Symb	ol A	В	С	W	T	t
Spec	Ø180 +0 -3	Ø60 +1 -0	Ø13±0.3	9±0.3	11.4±1.0	2.0 max.

^{*} The above reel is made of plastic and is recyclable.

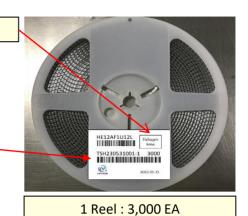

Halogen Free Label

5.6 Reel Packing Structure Example

Manufacturing Lot Number

1 Inner Box: 15,000 EA

Vacuum Packing

5 Reel

Inspection Sheet

Outer Box: 60,000 EA

8

6. Reliability

6.1 Test Item and Condition

No.	Test Item	Test condition	
1	High Temp. Storage	Ta = 150 ℃, t = 1000hr	
2	High Temp. Operation	Ta = 120 °C, lopr = 10mA, t = 1000hr	
3	Low Temp. Operation	Ta = -40 °C, lopr = 6mA, t = 1000hr	
4	High Temp. High Humidity Operation	Ta = 85° C, HR = 85% , lopr = 9mA, t = 1000hr	
5	PCT	Ta = 121° C, HR = 100% , Pv = 2 atm, t = 24 hr	
6	Thermal Shock	$T(L) = -55 ^{\circ}C$, $T(H) = 150 ^{\circ}C$, $t(L,H) = 30$ min, $M = 30$ cycle	
7	High Humidity Temperature Cycle	T(L) = -20 °C, T(H)= 85 °C, t(L,H) = 30min, HR = 95%, M = 40Cycle	
8	Soldering Heat Resistance	Peak Temp = 260 °C, t = 10sec, Reflow	
9	ESD(MM)	V = 500V, C = 200pF, R = 0Ω , 1sec, 1Time, Pin#1~Pin#3(EIAJ Condition)	

6.2 Criterion For Judging

After each reliability test, samples should be during at least 24 hrs in room Temp. & Humidity, and then measure. The change rates should be in the values as below.

Item	OK Spec	NG / OK
Rin		
Rout	Under Initial ±20%	OK (Spec. Sastisfying)
Vh		Ok (Spec. Sastisfying)
Vo	Max. ±5%	

^{*} Vo change ratio calculation method

Vo change ratio = (Vo-after - Vo-before) / Vh-before x 100%

7. The Analysis of RoHS(Restriction of Hazardous Substances)

It is guaranteed that there are no RoHS materials in Hall Sensor by specific analysis results

- References : RoHs 10 Materials
 - 1) Cadmium(Cd)
 - 2) Lead(Pb)
 - 3) Mercury(Hg)
 - 4) Hexavalent Chromium(CrVI)
 - 5) PBBs(Polybrominated Biphenyls)
 - 6) PBDEs(Polybrominated Diphenyl Ethers)
 - 7) DBP(Dibutyl phthalate)
 - 8) BBP(Butyl benzyl phthalate)
 - 9) DEHP(Bis(2-ethylhexyl) phthalate)
- 10) DIBP(Diisobutyl Phthalates)

8. Halogen Free

NANOS Hall sensor guarantees that it contains no Halogenated materials.

That is Halogen Free product and is confirmed by specific analysis results.

- References : Halogen Materials

1) Fluorine(F)

2) Chlorine(Cl)

3) Bromine(Br)

4) Iodine (I)

- Halogen- free limitation(unit: ppm)

Br: 900 ppm, Cl: 900 ppm, Br+Cl: 1,500 ppm

9. Important Precautions

- 1) Reprinting or reproducing this document in whole or in part without our prior written consent is prohibited.
- 2) The storage period of the product before use is one year in vacuum packaging, and the storage period of the product after opening is one year in a sealed state.
 - ※ Product storage environment recommendation: N2 Gas & Temperature 30 ℃ or less, Humidity 60%Rh
- 3) The quality and performance of the product are guaranteed for one year based on the date of manufacture. (This is based on the storage environment)
- 4) Our products described in this document (hereinafter referred to as "Product") and the specifications of this product are subject to change without notice to improve this product. Therefore, please check with your sales representative or our dealership representative to ensure that the information contained in this document is up-to-date.
- 5) The information contained herein provides examples of the operation and application of this product and does not warrant or license any intellectual property rights or other rights of our company or any third party upon its use. If you use the information in your equipment design, it is your responsibility and we are not responsible for any damage caused to you or any third party due to the use of the information.
- 6) This product is not intended or guaranteed to be used for highly reliable purposes, such as medical, aerospace, transport, traffic signal, combustion, nuclear control, and various safety devices, in which failure or malfunction of the equipment is usually expected to cause serious damage to life, body, property, etc.

Therefore, please do not use this product for these purposes unless otherwise authorized by us in writing. In the unlikely event that this product is used for these purposes, we shall not be liable for any damages arising from such use.

- 7) While we strive to improve quality and reliability, electronics can generally malfunction or fail. If you use this product, it is your responsibility to design the safety necessary for your product so that life, body, property, etc. are not compromised due to malfunction or failure of this product.
- 8) Do not use this product or the technical information contained in this document for purposes such as the development of weapons of mass destruction, military use, or other military purposes.

Do not use this product or the technical information contained in this document on equipment systems that are prohibited from being manufactured, used or sold under local laws and regulations.
